

Full Cream Goat Milk Powder

Goat milk, especially in its full cream powder form like CBM Full Cream Goat Milk Powder (FCGMP), also known as goat whole milk powder, is appreciated for its mild and creamy flavor, making it highly versatile in the food industry. The powder is produced by spray-drying fresh goat milk, which preserves its rich fat content and unique composition of easily digestible proteins.

In addition to its smooth texture, CBM goat milk powder provides key vitamins like A, D, B1, B2, B5, B6, B12, and is also rich in calcium, phosphorus, magnesium and zinc, important minerals. This all makes FCGMP an excellent choice as a wholesome product, suitable for a wide range of applications.

Key Benefits

- ✓ The high fat content contains a significant amount of easy to digest MCT fat. ^{1a, 1b}
- ✓ MCT fats are rapidly broken down and absorbed in the body. Thereby an excellent energy source for people of all ages as well for pets. ^{1a, 2}
- ✓ High protein quality: high content of essential amino acids including BCAA, important for muscle building. ^{3-5abc}
- ✓ Unique composition of highly digestible proteins, which are less allergenic than cow milk and can offer digestive comfort. ⁶⁻¹³
- ✓ Naturally provides key vitamins like A, D, B1, B2, B5, B6, B12, and is also rich in calcium, phosphorus, magnesium and zinc, important minerals. A + D. ⁴
- ✓ Contains prebiotic oligosaccharides. These prebiotics are the "food" for the beneficial gut bacteria, promoting gut health and maintaining overall health and wellbeing. ¹⁴⁻¹⁸
- ✓ Mild creamy flavour.
