

Goat Milk Protein Concentrate Powder

Goat Milk Protein Concentrate is an innovative superior quality protein powder made from the highest quality goat milk. Via a patented process a casein rich stream is spray dried. The proteins remain in a more native state resulting in a unique and easy to digest goat protein powder⁵⁻⁸ that is high in casein protein.

Casein protein is more gradually released into the body, making it an excellent powder for active (sports) people, elderly, or for those seeking to support their overall health through a daily intake of high-quality protein.

Key Benefits

- ✓ Unique and easy to digest casein protein, which is less allergenic than cow milk casein protein and can offer digestive comfort.¹⁻⁸
- ✓ High protein quality: high content of essential amino acids including BCAA (a.o. leucine), important for muscle building.⁹⁻¹²
- ✓ Excellent protein source for increased protein demands and a wide range of applications.
- ✓ Fresh mild neutral taste.

Product Information

Available in: MPC 60% and MPC 80%

Ingredients: 100% Goat milk

Production: Made in The Netherlands

Allergens: Contains milk

Storage: Best storage conditions:

- Dry place
- 15-25 °C
- Max. relative humidity of 65%
- Avoiding direct sunlight

Shelf life:

If stored properly, in the original packaging (unopened), a shelf life of 24 months can be guaranteed.

Packaging:

Standard gassed multiple paper bag with EVOH liner. Also non-gassed bag possible.

Packaging sizing:

- 20 kg bag
- 40 bags per pallet (plastic or heat treated wooden HT-ISPM 15 pallets)
